## ***BROOMATE***<sup>®</sup>

- You have limited time for cleaning and maintenance work?
- You are cost-conscious?
- You love simple solutions?
- You are not a fan of rotating brushes that can be maintenance intensive?

Broomate<sup>®</sup> – the perfect cleaning solution.  
This is how you sweep today!

In farming and agriculture simple solutions are needed, that are neither time-consuming nor expensive. Rotating brush machines are often maintenance intensive, the initial purchase price is high, as are the subsequent maintenance costs and they do not really serve the purpose. The Osborn Broomate® requires no hydraulics, nor an engine or rotating parts. It consists of stripbrushes mounted under a solid steel-hood. The construction is amazingly simple and the cleaning results are convincing, it can be easily mounted to existing farming vehicles (e.g. Bobcat, JCB, tractors, forklifts, frontloaders)\*.

\*) Standard version available ex-works to be mounted on a conventional forklift. Various mountings for other vehicles are available.

### A few application examples:

- Quick cleaning of public and farm roads
- Sweeping feed alleys
- Cleaning silos
- Cleaning stables / sweeping dung and slurry
- Storing crops / cleaning granary stores
- General farmyard cleaning / Maintenance work
- Shovelling snow and foilage
